To Whom it may Concern,

I'm writing this letter in opposition to Light Squared. I am a Register Land Surveyor in the State of Wisconsin, and I am disturbed and opposed to Light Squared plans of to construct and operate high-powered, land based, broadband transmitters in the spectrum adjacent to the low-powered Global Positioning System spectrum. WISCOR System is vital to my profession .So much time and monies have been put into the WISCOR Network, and it would be a travesty if it Light Squared were allowed to proceed with their plans. I hope you will put a stop to this madness. The sooner the better.

Sincerely

• Daniel S Kluge S2210 State of Wi Registered Land Surveyor
